

Force Sensor

ICP CALIBRATION DATA

Model 208B02 Cal Range 0 - 100 lbs. Input TC > 500 sec
S/N 12742 Sens* 52.06 mV/lb Rise Time 10 usec
Linearity* < 1.0 %FS Nat'l Freq 70 kHz By Chuck DiMaggio
* By comparison with reference standard per ISA S37.10. Zero Based best straight line. Output Imp < 100 ohms Date Dec 1, 1995

Calibration of instrumentation used to certify this sensor is traceable to NIST.
PCB Piezotronics' calibration procedure is in compliance with MIL-STD-45662A.
