

Force sensor

ICP CALIBRATION DATA

Model 208B03
S/N 12895

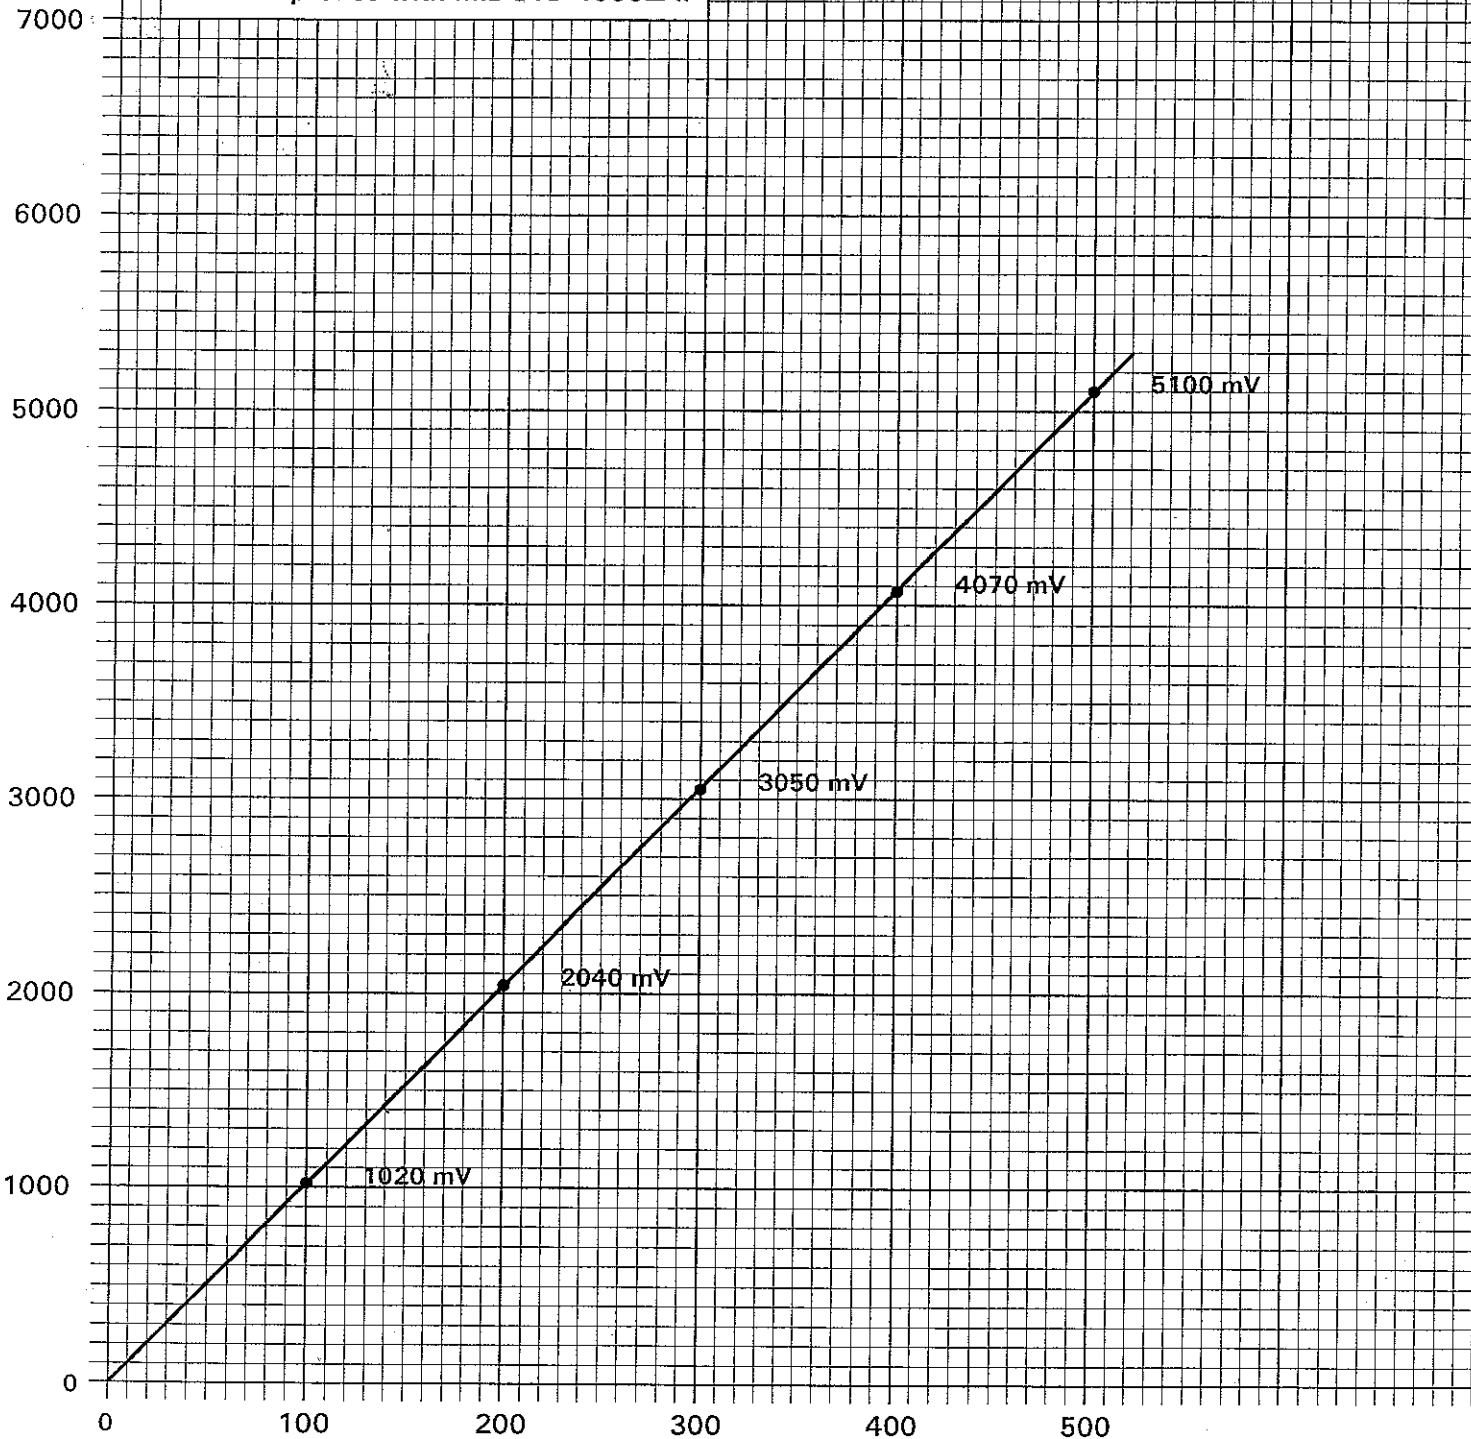

Cal Range 0 - 500 lbs.
Sens* 10.19 mV/lb
Linearity* < 1.0 %FS

Input TC > 2000 sec
Rise Time 10 usec
Nat'l Freq 70 kHz
Output Imp < 100 ohms

By Larry Chadwick
Date Mar 1, 1996

* By comparison with reference standard per ISA S37.10. Zero Based best straight line.

Calibration of instrumentation used to certify this sensor is traceable to NIST.
PCB Piezotronics' calibration procedure is in compliance with MIL-STD-45662A.
